WELLS, B.C.

## *Director's Report*

### **OPERATIONS**

Operations for 1964 resulted in a net profit of \$47,565, 2c per share, produced by milling 32,073 tons for a recovery of 19,867 ounces of gold.

The operating profit (before depreciation and depletion) was \$91,779, one of the best years in the last decade.

You will note from the Manager's report that the grade of ore mined and milled was .64 ounces per ton, the highest in the history of the mine.

The Company is very close to being out of debt for the first time since 1946. In 1963 the mortgage on the apartments was paid off and in March, 1965 sufficient funds were deposited with the trustee for the bondholders to retire the bonds.

The only debt left is some \$34,000 (as of March, 1965) due to the bank. This is being retired at \$4,000 per month.

### **ORE RESERVES**

Ore reserves were down at the end of the year, due mainly to the lack of skilled miners to maintain our development program at planned levels. However, in 1965 the resumption of full development work has resulted in the discovery of a new orebody of major dimensions estimated to extend a total length of 575 feet with a width of some 35-40 feet. This orebody was encountered from the third new level in the westerly extension of the mine.

The fourth level is opening up a complex of smaller orebodies which are not yet fully developed and the fifth level is presently being driven out to the favorable ground around the Mosquito Fault by our own crews.

We are confident this work will not only restore our reserves to their normal levels but will also provide a sound basis for increased production.

## FINANCING

Your directors have approved a financing program that, if fully exercised will place \$460,000 in the treasury. The majority of these funds will be used for an expanded development program in the mine to open up new levels in the Mosquito Fault zone. It is estimated that this block of ground could contain from \$20,000,000 to \$25,000,000 in gold.

The balance of the funds have been earmarked for outside exploration and we are presently negotiating with respect to two separate properties, the results of which will be announced in due course.

## DIRECTORS

During the year, the pressure of other matters compelled Messrs. Hall and Bell-Irving to resign from your Board; also the removal of Mr. Gordon B. Morris' offices to Toronto necessitated his resignation. Mr. P. M. Reynolds was elected in the year to fill one of the vacancies.

## GOLD

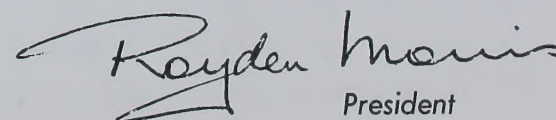

Everyone today is talking about GOLD. The Power of Gold — the Excitement of Gold — the Fineness of Gold — the Value of Gold.

If the price of gold rises substantially your directors will place your No. 1 Mine in full production again. This mine in area and underground workings is by far the largest of our two mines and extends some 4½ miles to Barkerville. What an operation we would have then, the new Mosquito mine in the westerly extremity — the Aurum in the centre and the No. 1 in the East.

## CONCLUSION

We extend our thanks to each member of our staff for his loyalty and service to our company this past year.

On Behalf of the Board,

  
President

# Manager's Report

The President and Directors,  
The Cariboo Gold Quartz Mining Company Limited (N.P.L.),  
913 Royal Bank Building,  
Vancouver 2, B.C.

Dear Sirs:

Herein find a report on your company's operations for the year ended December 31, 1964.

## PRODUCTION

	<u>1964</u>	<u>1963</u>
Ore mined and milled (dry tons) .....	32,073	34,702
Gold produced (fine ounces) .....	19,867	18,308
Silver produced (fine ounces) .....	3,815	3,165
Gross value of Bullion* (Excl. E.G.M.A.) .....	\$755,191	695,537
Value of E.G.M.A. ....	\$204,136	\$188,119
Average tons milled per day .....	87.6	95.1
Average mill heads .....	.6386	.5467
Average mill tails .....	.0192	.0191
Recovery percentage .....	97.00	96.51
E.G.M.A. per ton .....	\$ 6.36	\$ 5.42
E.G.M.A. per ounce Gold .....	\$ 10.28	\$ 10.28
Average price of Gold per ounce .....	\$ 37.74	\$ 37.75
Average value of Ore* per ton .....	\$ 23.55	\$ 20.04
Average value of Ore* per ton including E.G.M.A. ....	\$ 29.91	\$ 25.46
Average value of Ore* per ounce including E.G.M.A. ....	\$ 48.29	\$ 48.27

\*Includes Gold and Silver

	<u>1964</u>			<u>1963</u>		
	Tons	Grade	Ounces	Tons	Grade	Ounces
Stoped .....	29,667	.651	19,315	32,945	.554	18,264
Development .....	2,231	.480	1,070	1,757	.463	813
Adjust for ore from bins and mint correction	+175		+97			—106
Tons milled .....	32,073	.639	20,482	34,702	.547	18,971
Replacement ore mined and developed .....	28,158	.675	19,018	28,470	.588	16,752
The percentage to all ore mined .....	91%		93%	82.0%		87.8%

There were 40 stopes in production during 1964 of which 33 were of replacement sulphides and the remainder of the quartz vein type.

The grade of ore mined increased from an average of .55 oz. gold per ton in 1963 to nearly .64, the highest grade in any one year in the history of the mine. The sulphide ores were wholly responsible for the increase, advancing from a grade of .59 to .69 in this period. This indicates that the ore found in the western end of the mine has, consistently, a higher gold content than in the older section around the Aurum Fault.

Stoping of the ore discoveries of 1963-64 is continuing on all levels below the 3250 elevation. A new orebody (52B), of major dimensions, is being developed, at this date, on the 3125 level. The ore found at the extreme westerly end of the mine was first found by diamond drilling in the footwall of the Mosquito Fault. Cross-cutting of this ore on the level indicates a width of over 25 feet, a depth of up to 15 feet and an indicated length, up-plunge, of some 225 feet. No development has been done below the level but if the ore persists as shown to date it could extend a possible 350 feet down-plunge to the 3000 level. Grade of these development mucks stands at .63 to date.

Development, (including slash footages), amounted to the following:

Drifts	X-Cuts	Raises	Box Holes	Total	D. Drill	Test Hole
<u>5,700</u>	<u>842</u>	<u>1,041</u>	<u>281</u>	<u>7,864</u>	<u>22,612</u>	<u>12,384</u>
<u>1964</u>				<u>1963</u>		
<b>COSTS</b>	Amount	Per Ton	Per Oz.	Amount	Per Ton	Per Oz.
Bullion Expense .....	\$ 6,046	\$ .19	\$ .29	\$ 5,340	\$ .15	\$ .29
Development .....	225,688	7.04	11.37	244,068	7.03	13.33
Mining .....	439,223	13.70	22.14	422,915	12.18	23.10
Milling .....	138,225	4.31	6.97	129,760	3.74	7.09
Mine overhead .....	17,781	.55	.90	12,876	.37	.70
Administration .....	40,585	1.27	2.05	48,816	1.41	2.67
Total .....	<u>\$867,548</u>	<u>\$27.06</u>	<u>\$43.72</u>	<u>\$863,775</u>	<u>\$24.88</u>	<u>\$47.18</u>

The cost of processing the ore increased \$2.18 per ton over 1963 due largely to lesser tons milled while the cost per ounce decreased by \$3.46 inversely in relation to the increased grade.

## GENERAL

The Wells Townsite Co. Ltd., continued supplying services to the community. The Gold Quartz Hospital Ltd. showed a modest profit of \$205.30, a welcome change from the losses of former years.

The payroll averaged 113 including the hospital staff.

A collective bargaining agreement was entered into with the Wells Miners' Union in August 1964 which subsequently was cancelled by a new two year agreement dated February 8th, 1965, necessitated when legislation forced the 40 hour week onto the company.

Respectfully submitted,

MARCEL GUIGUET, Manager

Wells, B.C.  
March 30, 1965.

## Consulting Engineer's Report

The President,  
The Cariboo Gold Quartz Mining Company Ltd.,  
913 Royal Bank Building,  
Vancouver 2, B.C.

Dear Sir:

Herewith my report for the calendar year 1964 on your company's operations at Wells, B.C.

### ORE RESERVES

Work has continued in the Aurum mine and its extensions westerly into the Burnett and Mosquito Fault areas. Following are the ore reserves estimated as reasonably assured for same:

	Tons	Grade	Ounces
1964 Ore Reserves .....	87,860	.59	51,670
LESS Ore mined 1964 .....	29,667	.65	19,315
Cancellations .....	19,247		13,941
	38,946		18,414
ADD Ore Found in 1964 .....	25,904	.62	16,206
1965 Ore Reserves .....	64,850	.53	34,620

These figures show a decrease of 8,610 tons and 11,260 ounces gold in the replacement ore reserves from the previous year, and of 14,400 tons and 5,790 ounces gold in quartz ore. The cancellations will be noted, of which 12,000 tons was contributed

by deletion from the 3125-62 group of quartz stopes. These extensive workings have reached 100 feet below the flooded No. 1 Mine. Only the better ore sections are to be excavated further. It is estimated the figure of 12,000 tons of 0.32 ore will remain unmined as below economic grade. As such, it has been transferred to the reserves of record of the No. 1 Mine.

The major contributory factor to the decrease in ore reserves was the sharp curtailment of lateral development that occurred during the second half of the year. Labour shortages were sufficiently serious as to require transfer of development crews to production, and to limit production also.

In addition to the above, the following are the reserves of record now carried for the inactive No. 1 Mine:

Tons	Grade	Ounces
58,410	.37	21,419
46,600	.27	12,582
12,000	.32	3,840
117,010	.32	37,841

As has been noted each year, these are nominal figures attached to incompletely developed quartz ore occurrences in the No. 1 Mine. Their gold values are too low to support present costs of development and exploitation. These quantities, however, should find substantial increase if such ore grades become economic once again.

## PRODUCTION

Ore mined and treated for the year is reported as 32,073 tons of an average grade of 0.64 ounces containing 20,482 ounces gold, divided as follows:

	Tons	Grade	Ounces
Quartz Ore Mined .....	3,470	.37	1,295
Replacement Ore Mined .....	26,197	.69	18,020
Development Ore .....	2,406	.49	1,167
	32,073	.64	20,482

Bullion produced is reported as 19,867 ounces gold for a tailing loss of 0.0192 ounces gold per ton, a mill recovery of 97.0 percent.

The further diminution in the part played by the quartz ore will be observed. Ninety percent of the reported figure was obtained from 62 Vein system on the 3125 level, at the east end of the old mine. The balance was obtained incidental to mining of a replacement orebody on the 2850 level against the Burnett Fault.

The unimportance of the old mine as a production source is shown in the following figures:

	Tons	Grade	Ounces
Old Workings .....	7,427	.49	3,644
Westerly Extensions .....	22,240	.70	15,671
	29,667	.65	19,315

## DEVELOPMENT

A total of 6,393 feet of level development is reported for the year. Of this, 3,816 feet was capital development performed by contractors who commenced work November 13 last year.

They completed extension of the 3,125 level into the footwall of the Mosquito Fault, and commenced similar extension of the 2,700 level before the end of last year. They completed the latter in July of this year.

Immediate results of this work was the discovery of three replacement ore bodies on the 3,125 level encountered in the course of the drive. No ore was encountered in the course of the 2,700 level drive. Diamond drilling subsequently disclosed the 2,700-52 replacement ore complex and two new orebodies at the west end of the 3,125 level.

Exploration has been limited, however, to the immediate areas along the course of the level extensions. Normally the areas of search are broadened by cross-cutting and drifting across the entry headings. Since June it has not been possible to proceed with normal level development due to extreme shortages of underground labour. Such development crews as were available have been devoted largely to the effort of maintaining production.

It was January 1965 before the required minimum of development crews became filled. These are now fully committed with one exception to crosscutting the structures in the new workings to provide drill stations for exploration. The exception is a crew currently advancing the 3,250 level to the Mosquito Fault. This heading has now reached into the footwall of the Burnett Fault, and should be encountering ore bodies indicated on the 3,125 level.

Respectfully submitted,

Vancouver, B.C.

E. E. MASON, P.Eng.

March 15, 1965.

## AUDITORS' REPORT

**MCDONALD, CURRIE & CO.**  
CHARTERED ACCOUNTANTS

To the Shareholders  
The Cariboo Gold Quartz Mining Co. Ltd.  
(Non-Personal Liability)  
Vancouver, Canada

We have examined the balance sheet of The Cariboo Gold Quartz Mining Company Limited (Non-Personal Liability) as at December 31, 1964, and the statements of deficit and operations for the year ended on that date, and have obtained all the information and explanations we have required. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, and according to the best of our information and the explanations given to us and as shown by the books of the company, the accompanying balance sheet and statements of deficit and operations, when read in conjunction with the notes thereto, are properly drawn up so as to exhibit a true and correct view of the state of the affairs of the company as at December 31, 1964, and the results of its operations for the year ended on that date, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

In accordance with Section 159 of the Companies Act of the Province of British Columbia, we report that the aggregate of the loss less profit of the subsidiary companies has been provided for in arriving at the profit of the Cariboo Gold Quartz Mining Company Limited (Non-Personal Liability).

MCDONALD, CURRIE & CO.  
Chartered Accountants

April 6th, 1965.

## Notes to Financial Statements

AS AT DECEMBER 31st, 1964

1. The following investments in and advances to subsidiary companies are shown at the lesser of cost or cost less amounts written off, and are not intended to reflect present or future values.

	Investment in Shares	Advances	Total
The Wells Townsite Company Limited (wholly owned)	11,766	16,604	28,370
Gold Quartz Hospital Limited (wholly owned)	6,846	6,177	13,023
Williams Creek Gold Quartz Mining Company Limited (N.P.L.)	130,939	—	130,939
French Mines Ltd. (N.P.L.) (wholly owned)	<u>1</u>	<u>—</u>	<u>1</u>
	<u>\$149,552</u>	<u>\$22,781</u>	<u>\$172,333</u>

2. Pursuant to the terms of the Trust Deed securing the 7% First (Closed) Mortgage Sinking Fund Convertible Bonds, the bondholders may, at their option, convert the bonds to shares of the company at the rate of one share for \$1 principal of bonds. Otherwise, the company is required to make the final sinking fund payment of \$45,000 at September 30th, 1965.

On March 31, 1965, the company deposited, in its own name, \$45,000 with the trustee for the bondholders to be invested in guaranteed investment certificates. This deposit, together with funds already held by the trustee is sufficient to retire the bond issue in full.

3. The Company is required to retain sufficient shares in its treasury to meet the following commitments:

a) 6,691 shares optioned to the underwriter of the bond issue at \$1 per share exercisable in whole or in part at any time up to the day upon which all bonds have been retired.

b) 88,000 shares to fulfil the conversion privileges of the 7% First (Closed) Mortgage Sinking Fund Convertible Bonds outstanding.

c) 25,000 shares to fulfil an employee's stock option agreement at \$0.50 per share exercisable up to May 31st, 1968.

d) As of March 17th, 1965, 800,000 shares to fulfil the terms of an underwriting and option agreement as follows:

200,000 shares to be purchased at \$0.50 per share forthwith.

200,000 shares on an option basis at \$0.50 per share payable on or before June 15th, 1965.

200,000 shares on an option basis at \$0.60 per share payable on or before September 13th, 1965.

200,000 shares on an option basis at \$0.70 per share payable on or before December 12th, 1965.

The Company has received \$100,000 as payment for 200,000 shares purchased at \$0.50 per share pursuant to the agreement.

4. After deduction of depletion allowances under the Income Tax Act, no income taxes are exigible for the year.
